The time has come for a solution that will last. Rotary will find it.

The biggest killer of children under the age of FIVE is unsafe water: 1.8 million children die every year – ONE child will die every 17 seconds and 5000 children will die today.

About the Water & Sanitation Rotarian Action Group

The official resource to Rotary clubs and districts for Water, Sanitation and Hygiene (WASH) projects and programs

JOIN WASRAG NOW!
Go to www.wasrag.org, click on “Sign Up” and follow the steps.
Charter (5 yr.) membership: $100 US;
Annual membership: $25 US.

Unsafe water, lack of basic sanitation and poor hygiene cause 80% of all sickness and disease and kill more people than all forms of violence, including war.

USE WASRAG RESOURCES TO SUPPORT YOUR PROJECT:
- Find the “right” project for your club
- Get help for the needs assessment
- Find Rotary partners, NGOs and corporate support
- Choose appropriate technology
- Leverage funds from Rotary and other sources
- Access expertise for all phases of the project
- Promote your project around the world
- Facilitate collaboration between clubs and districts
WASH: THE FULCRUM FOR ALL “AREAS OF FOCUS”

Without safe water and sanitation, life and livelihood are under threat:
- 8000 people die every day from waterborne disease
- Women and children (usually girls) spend hours each day fetching water, often under threat of violence
- Lack of sanitation and privacy lead to early drop-out from school among girls
- Every year, 40 billion hours spent collecting and hauling water in Africa alone
- Disputes over water jeopardize peace in every continent
- Drought and starvation threaten lives and livelihood of millions of people.

WASRAG IS HELPING CLUBS EVERYWHERE BUILD A BETTER FUTURE FOR THEIR COMMUNITIES:
Rotary projects improve quality of life, e.g.:
- Implementing rainwater harvesting
- Building toilets and sanitation systems
- Digging wells and drilling boreholes
- Building dams and gully plugs; recharging the aquifer
- Building local capacity, changing behaviour
- Working with NGOs, CBOs to create self sufficiency
- Setting up factories to build slow-sand filters
- Creating opportunities for entrepreneurs in the WASH supply chain

At this moment, 900 million people in the world do not have access to a source of safe water within 1 km of their home; 2.5 billion lack access to adequate sanitation, 1 in 4 in the developing world has none.

Women in developing countries walk an average of 6 km daily to get water, and carry as much as 20 kg.

WASRAG SOLUTIONS WORK: THEY ARE TRULY SUSTAINABLE:
- Start with the community - understand their needs
- Support a “Water Users’ Committee”
- Engage local authorities: identify WASH gaps in the region
- Involve international partners and NGOs
- Facilitate discussions on the need and appropriate solutions
- Prepare a “Needs Assessment” and implementation strategy
- Estimate 10-year costs; calculate the tariffs to sustain the service
- Seek agreement and commitment from all parties
- Monitor and evaluate; record lessons learned

YOU TOO CAN MAKE A HUGE DIFFERENCE:
Join WASRAG and change millions of lives
- Volunteer your expertise, use your experience
- Join a Needs Assessment Team
- Be the link between Rotary and other humanitarian organizations
- Help raise funds for Rotary club projects
- Be the point person for WASH in your club
- Be the link for WASH projects in other countries
- Educate Rotarians about the importance of WASH
- Become the spokesperson for WASH news and events in your club and community
