

THE WASRAG WEBSITE – ONWARDS AND UPWARDS!

Have you looked at the WASRAG website lately? If not, please take a moment and see what's going on! We are continually striving to improve and enhance the resources and information offered. And, our website administrator, Sum Cheung is working in the background to make sure that the site runs smoothly at all times.

Here are some of the more recent changes:

- The DVD: "Rotary – the Water Story" is now available on the website. You will find it under the "Resources" section - <http://wasrag.org/downloads.php?resources=37> This version can be downloaded to your own computer. We should mention that the quality is not quite as good as the original DVD. We still have copies of the original DVD available for anyone needing a copy with a higher resolution.
- A new Success Story! Click on the "Success Stories" box on the home page of the site. Success Story #3 gives an account of how Belgian Rotarians are bringing safe water to a remote region of Niger.
- Parts of our site are now available in German. German Rotarian Klaus-Peter Schulz identified a young man by the name of Tobias Schwertmann who volunteered to do the translation for us. Tobias, age 21, and studying at the Hanze University in Groningen (Netherlands) has strong connections to Rotary. He's a former RYEP participant (2002-03). Not only that, his father is a Rotarian (RC of Cloppenburg/Quakenbrueck).
- From D-3280 (Bangladesh) a new brochure "Arsenic and what we should do." Prepared with the financial support of The Rotary Foundation and a 3H Grant, this document represents a truly amazing amount of work by the Rotarians of Bangladesh and experienced NGOs who worked on the Bangladesh Arsenic Mitigation Project.
- And finally, a big THANK YOU to everyone who responded to our request for feedback on the use of the LifeStraw. Some information on the LifeStraw has been included in the "Resources" section. Also our apologies - we received so many replies that we are unable to get back to everyone personally.
